

Engr. Ruzzel A. Dulay, RCE

Registered Civil Engineer

Location: Taguig City, Philippines

Phone: +63 994 944 1466

Email: dulayruzzel13@gmail.com

Portfolio: portfolioruzzeldulay.netlify.app

PROFESSIONAL SUMMARY

Registered Civil Engineer and 2024 TIP-Manila graduate with early-career experience across structural-modeling support, technical estimating and construction cost control. I work with drawings, specifications, project records and reporting tools, and communicate outstanding requirements with project personnel. I bring engineering fundamentals, adaptability and a willingness to learn, supported by research and ongoing software-development projects.

EDUCATION

Technological Institute of the Philippines - Manila

BS Civil Engineering | 2024

Registered Civil Engineer

PRC | Licensed November 2024

DOST-SEI Scholar

2020 - 2024

LANGUAGES

- Filipino
- English

SKILLS

Tools and workflows

- ETABS and AutoCAD
- Microsoft Excel / VBA
- Python fundamentals and tools
- Technical documentation
- Project communication

Technical competencies

- Engineering fundamentals
- Drawing and specification review
- Quantity and pricing inputs
- Reporting and coordination
- Review-oriented problem solving

WORK EXPERIENCE

Millennium Erectors Corporation **Apr 2026 - Present**

Cost Control Engineer

- Coordinate outstanding documents and requirements with project personnel for review.
- Prepare progress-billing support, subcontractor endorsements, and purchase-order and contract documentation.
- Monitor project costs against budgets and prepare budget-versus-actual and cost-variance reports.
- Maintain project trackers, Excel dashboards and cash-flow reporting; automate recurring reporting steps.

International Elevator & Equipment, Inc. **May 2025 - Apr 2026**

Cost Estimator

- Reviewed engineering drawings and specifications to organize quantity and pricing inputs.
- Prepared technical estimates and quotations for Mitsubishi Electric building transportation systems.
- Developed Excel/VBA tools for repeatable estimating and quotation preparation.

Alliance Textile Mills Inc. **Jan - Apr 2025**

Junior Civil Engineer

- Assisted with ETABS structural modeling, AutoCAD documentation and engineering plan review.
- Prepared quantity takeoffs and construction-related schedules to support civil-engineering work.

UNDERGRADUATE RESEARCH

Nonlinear Seismic Time-History Analysis

- Five-story school building; comparison of selected seismic-performance strategies.

CREDENTIALS

Registered Civil Engineer

Professional Regulation Commission

Licensed November 2024

DOST-SEI Scholar

2020 - 2024

PORTFOLIO

portfolioruzzeldulay.netlify.app

CHARACTER REFERENCE

Paul Symon Dator

Engineering and Sales Assistant Manager

International Elevator & Equipment, Inc.

0977 814 6408

ENGINEERING APPROACH

- Understand inputs and assumptions.
- Organize calculations and documentation.
- Review outputs and investigate discrepancies.

SELECTED PROJECTS & TECHNICAL WORK

Nonlinear Seismic Time-History Analysis Thesis

- Undergraduate analysis of a five-story school building, comparing selected seismic-performance strategies through nonlinear time-history analysis.

Structural Modeling & AutoCAD Documentation

- Supported ETABS modeling, AutoCAD drawing documentation, quantity takeoffs and engineering plan review.

MEC Cost-Control Automation & Dashboards

- Develop Excel reporting and automation workflows for cost monitoring, document tracking and management review. Employer records and internal project data remain confidential.

Pandarithm | Independent Engineering Software

- Developing a web-based platform for structural analysis and engineering design calculations, including finite element and matrix stiffness formulations.
- Translate engineering approaches into computational procedures; use manual and reference comparisons to investigate selected outputs. Beta development and verification remain ongoing.

pandarithm-beta.onrender.com

IEEI Excel/VBA Estimating Automation

- Developed spreadsheet tools to organize estimation and pricing inputs and make quotation preparation more repeatable for building transportation systems.

DEVELOPMENT & VERIFICATION

- Pandarithm remains an ongoing beta. Individual modules have different levels of development and verification.
- Software implementation includes AI-assisted coding, debugging and refinement alongside engineering formulation and review.
- Independent software is developed through module-by-module testing, refinement and engineering review.
